

When it comes to backing up,
why look anyplace else?

Backing up is inherently difficult. That's why automakers are offering rear camera systems, and why Gentex developed a display for the rearview mirror -- an intuitive, ergonomic location that lets you view the reflected scene and display simultaneously.

Ask your dealer about Gentex auto-dimming mirrors when buying your next new vehicle, or contact MITO Corporation at 1.800.433.6486 or www.mitocorp.com.

The Gentex rear camera display... why look anyplace else?
